

Personalized over-the-counter guidance for the people you care about most.

https://otc-me-connect.lovable.app

Made with ElevenLabs

The Problem

- Nearly **1 in 2** American adults live with one or more chronic conditions without OTC guidance
- **100,000+** ER visits each year are associated with OTC medication misuse, adverse reactions, and accidental pediatric exposures
- Community pharmacists answer OTC medication questions **~32 times** per week

The solution: OTC&Me

OTC&Me helps people choose safer OTC medications by using the patient’s pharmacy profile, symptoms, age, life stage, medications, and health conditions to generate personalized recommendations.

How OTC&Me works

Step 1

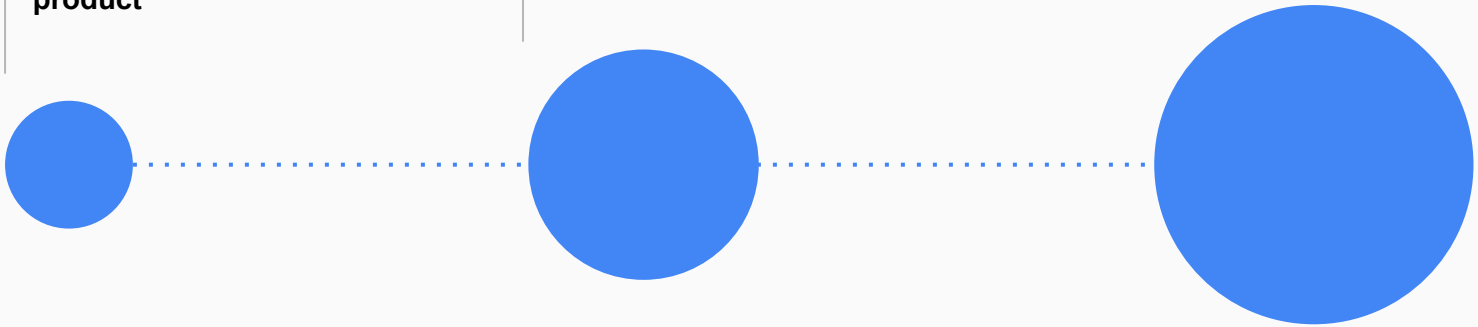

Start with the person, not the product

Step 2

Screen for safety risks

Step 3

Recommend the right OTC option or escalate

A Scalable SaaS Opportunity Across Retail Pharmacy

- **TAM: $170B** in estimated annual front-store sales across ~68,000 U.S. retail pharmacies, representing the total retail revenue base that OTC&Me could ultimately influence.
- **SAM: $42.5B** in estimated annual sales across the OTC and health-product categories initially supported by OTC&Me, assuming these categories represent approximately 25% of total front-store sales.
- **SOM: $5.6B** in estimated addressable OTC-related sales through an initial CVS-scale national partnership, with a smaller paid pilot used to validate that we drive purchases before chain-wide expansion.

TAM: Total Addressable Market
SAM: Serviceable Available Market
SOM: Serviceable Obtainable Market

Competitive Analysis

While existing solutions address individual parts of the OTC medication journey, OTC&Me integrates personalized health profiles, symptom assessment, safety screening, medication scanning, voice interaction, family management, and pharmacy discovery into a single platform.
